Standard dimensions are measured to the exterior boundaries of the exterior walls and the center line of interior dividing walls and in feet may from the dimensions that would be determined by using the description and definition of the "Unit" set forth in the Declaration (which generally only include the interior spaces between the perimeter walls and exclude interior structural components). For your reference, the area of the Unit, determined in accordance with these defined and boundaries, is 1,181 sq. ft. Note that measurements of rooms set forth on this floor plan are generally taken at the greatest points of each given room (as if the room were a perfect rectangle), without regard for any setbacks. Accordingly, the area of the actual rooms is typically less than the product obtained by multiplying the stated length times width. All dimensions are approximate and may vary with actual construction, and all floor plans and development plans are subject to change.
