Shared dimensions are measured to the nearest 1/8 inch of the exterior walls and the centerline of interior dividing walls and to feet and inches from the dimensions that would be determined by using the description and definition of the "Unit" set forth in the Declaration (which generally only includes the interior spaces between the partition walls and excludes interior structural components). For your reference, the area of the Unit, determined in accordance with those defined and boundaries, is x' x' sq. ft. for units. Note that measurements of rooms set forth on this floor plan are generally taken at the greatest points of each room (not at the narrowest points), without regard for any alcove. Accordingly, the area of the actual rooms is typically less than the product obtained by multiplying the stated length times width. All dimensions are approximate and may vary with actual construction, and all floor plans and development plans are subject to change.
