Stated dimensions are measured to the center of lines of the exterior walls and the center of interior closing walls and in feet and inches. The dimensions that would be determined by using the description and definition of the "Unit" set forth in the Declaration (which generally only includes the interior surface between the perimeter walls and includes interior structural components). For your reference, the area of the Unit, determined in accordance with those defined and boundaries, is 1,208 sq. ft. for units. Note that measurements of rooms and built on this floor plan are generally taken at the greatest points of each given room (as if the room were a perfect rectangle), without regard to any setbacks. Accordingly, the area of the actual rooms is typically less than the product obtained by multiplying the stated length times width. All dimensions are approximate and may vary with actual construction, and all floor plans and development plans are subject to change.
